S.5	Incentive Mechanisms and	A Proof-of-Work (PoW) consensus mechanism
	Applicable Fees	incentivizes miners to secure the network by
		publishing updates to the ledger in the form of
		blocks, containing newly submitted and verified
		transactions. Miners compete to solve
		cryptographic puzzles, and the first to succeed
		earns newly minted crypto-assets (block
		reward) and user-paid transaction fees.
		Misconduct, such as attempting to add invalid
		blocks or rewrite the history of the ledger, results in wasted computational resources and
		opportunity costs, creating an economic penalty
		that discourages dishonest behavior.
