S.5	Incentive Mechanisms and	A Proof-of-Work (PoW) consensus mechanism	
	Applicable Fees	incentivizes miners to secure the network by	
		publishing updates to the ledger in the form of	
		blocks, containing newly submitted and verified	
		transactions. Miners compete to solve	
		cryptographic puzzles, and the first to succeed	
		earns newly minted crypto-assets (block	
		reward) and user-paid transaction fees.	
		Misconduct, such as attempting to add invalid	
		blocks or rewrite the history of the ledger,	
		results in wasted computational resources and opportunity costs, creating an economic penalty	
		that discourages dishonest behavior.
